

IP Recode

Parking tickets issued in a parking garage can be recoded with IP Recode, providing an additional service to customers. The unit can be installed anywhere and is directly connected to the internet. If no internet connection is available, IP Recode can be equipped with a GPRS connection. An optional four or eight push buttons can be installed enabling use of multiple recoding profiles.

Parking tickets can be recoded, for example, to:

- One free exit
- 1 euro discount on the parking fee
- 2 hours of free parking
- 1 week Unlimited access

Standard features:

- 20- character / 2-line display with LED backlight display
- Barcode scanner
- Table support
- Black housing made of impactresistant ABS plastic

Optional:

- Mifare card reader
- Four push buttons
- Enlarged panel with eight push buttons
- Wireless communication via GPRS
